

1       **(3) CLAIM AMENDMENTS**

2  
3       1.       (CURRENTLY AMENDED) A computer annotator system for accessing Internet data  
4 addresses, the system comprising:  
5               an electronic tablet having visible marking capability;  
6               a marking stylus associated with the tablet;  
7               a device for associating at least one temporarily marked location on said tablet via said  
8 stylus with a preselected Internet data address wherein subsequently accessing said  
9 temporarily marked location on said tablet with said stylus triggers a shift of current computer  
10 Internet data address to said preselected Internet data address associated with said marked  
11 location.

12  
13       2.       (ORIGINAL) The system as set forth in claim 1 comprising:  
14               said tablet having at least one predetermined first surface region accessible to said  
15 stylus wherein annotating function commands are implemented.

16  
17       3.       (CURRENTLY AMENDED) The system as set forth in claim 2 comprising:  
18               said tablet having at least one predetermined second surface region accessible to said  
19 stylus wherein freehand symbols indicative of the preselected data address are entered.

20  
21       4.       (PREVIOUSLY CANCELLED)

22  
23       5.       (CURRENTLY AMENDED) A method for indexing computer-accessible Internet sites  
24 via a computer writing tablet and associated writing stylus associated with a computer having a  
25 browser for interacting with Internet sites, the method comprising:  
26               accessing a first of said sites;  
27               associating an address indicative of the first of said sites with a first location coordinate  
28 address on a computer writing tablet via a first visible marking at a first random location on said  
29 writing tablet during access of said first of said sites;  
30               accessing a second of said sites; ~~[[ and ]]~~

1 associating an address indicative of the second of said sites with a second location  
2 coordinate address on the computer writing tablet via a second visible marking on a second  
3 random location on said writing tablet during access of said second of said sites, such that re-  
4 access to each of said first of said sites and second of said sites is provided directly via said  
5 stylus and said first visible marking and said second visible marking, respectively, and;  
6 erasing each said visible marking on said writing tablet after completing an Internet  
7 session with said browser.

8  
9 6. (CURRENTLY AMENDED) The method as set forth in claim 5 further comprising:  
10 continuing said ~~[[ method ]]~~ associating for a plurality of computer-accessible internet  
11 sites other than said first and said second as long as there is available space for a further visible  
12 marking.

13  
14 7. (CANCELLED)

15  
16 8. (CURRENTLY AMENDED) A method for using a computer writing tablet, the method  
17 comprising:  
18 initiating an Internet session;  
19 associating an input-output port of the tablet with signals indicative of Internet-  
20 associated computer data addresses;  
21 when each of a plurality of the Internet-associated computer data addresses is  
22 accessed, writing a temporary and visible mnemonic object on said tablet such that each said  
23 mnemonic object is temporarily associated ~~[[ therewith ]]~~ with one of said plurality of the  
24 Internet-associated computer data addresses at respective random locations on said tablet  
25 respectively~~[, wherein a location on said tablet of the mnemonic object is coupled to a current~~  
26 ~~one of said Internet-associated computer data addresses, and]];~~  
27 re-accessing any specific one of said plurality of the Internet-associated computer data  
28 addresses during the current Internet session by selecting the mnemonic object associated  
29 therewith, and

1 upon concluding said Internet session, automatically erasing each said mnemonic  
2 object.

3  
4 9. (ORIGINAL) The method as set forth in claim 8 comprising:  
5 predefining specific locations on said tablet with data indexing functions.

6  
7 10. (CANCELLED)

8  
9 11. (CURRENTLY AMENDED) A computerized method comprising:  
10 accessing an internet site; ~~[[ and ]]~~  
11 associating an address of the site with a temporary writable-erasable mnemonic device  
12 in a computer writing tablet such that said site is re-accessible directly from said writable-  
13 erasable mnemonic device; and  
14 automatically alternating access between a plurality of addresses accessed and  
15 associated with mnemonic devices by alternating current selection between said mnemonic  
16 devices with a writing tablet writing instrument.

17  
18 12. (ORIGINAL) The method as set forth in claim 11 comprising:  
19 providing writing table function keys associated with writing-erasing a mnemonic device  
20 on said computer writing tablet.

21  
22 13. (ORIGINAL) The method as set forth in claim 11 comprising:  
23 providing predetermined coordinate regions of the writing tablet such that each said  
24 mnemonic device is automatically associated with one of said predetermined coordinate regions  
25 when entered therein.

26  
27 14. (CANCELLED)

28  
29 15. (PREVIOUSLY SUBMITTED) A computer memory comprising:

1 computer code for recording temporary symbols associated with an Internet site  
2 address;  
3 computer code associating the Internet site address with a writable-erasable mnemonic  
4 device in a computer writing tablet for receiving said temporary symbols; and  
5 computer code for accessing said Internet site address via said temporary symbols.  
6

7 16. (PREVIOUSLY CANCELLED)  
8

9 17. (CURRENTLY AMENDED) An internet search tool comprising:  
10 an internet access device;  
11 in communication with the internet access device, a writing tablet and associated inking  
12 stylus; and  
13 associated with the combination of internet access device, writing tablet and stylus,  
14 program code using said tablet for generating temporary handwritten mnemonics associated  
15 with internet site address bookmarks [[there]] on said tablet such that each of said mnemonics is  
16 address related to respective search resultant internet sites such that said sites are re-  
17 accessible directly via said bookmarks using said stylus on said tablet for activating each jump  
18 from a current internet site address to an internet site associated with another selected one of  
19 said bookmarks.  
20

21 18. (CANCELLED)  
22

23 19. (ORIGINAL) The tool as set forth in claim 17 wherein each of said bookmarks is a  
24 temporary representation of coordinates on said writing tablet.  
25

26 20. (CANCELLED)
